Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: PHS Reports Clearance Officer, Rm. 721-B, Humphrey Building, 200 Independence Ave., SW, Washington, D.C. 20201, ATTN: PRA; and to Office of Management and Budget, Paperwork Reduction Project (0925-0406), Washington, D.C. 20503.
This questionnaire is intended to be administered utilizing a CATI system. The following specific information will be available electronically prior to the start of the interview:

- Subject Name
- A2GENDER
- Gender
- Birthdate A2ENRDOB / A2_SASDATE_ENRDOB
- Address; City, State, Zip Code A2ENRDATE
- Enrollment Date A2_SASDATE_STARTDA
- Current Date
- Current Time

In addition, the CATI system will contain listings of common crops, animals, pesticides, pesticide application methods, etc., to facilitate the interviewer data entry.

In this document and when using the CATI system:

- **LARGE CASE PRINT** = instructions to the interviewer; do not read these to the respondent
- **Shaded Areas** = instructions to the programmer (will not appear on CATI screen); do not read to the respondent
- **Underline** = portions of the question to be verbally stressed by interviewer; will appear as bold text on CATI
- **(Parenthesis)** = clauses that the interviewer can choose to read or not to read, depending on the flow of the interview and the respondent’s grasp of the question
- **< >** = response edit check. A signal screen will appear: “Response is not in normal range. Are you sure this is correct?”
- **<< >>** = response range. A signal screen will appear: “Input invalid, value not in range”. Interview must change response.

WHEN CONDUCTING AN INTERVIEW WITHOUT USING THE CATI SYSTEM, FILL IN:
